

Learn How To Play The Guitar

In our modern times most people do not feel like they need to learn to play a musical instrument like the guitar. But if you learn how to play the guitar you will be getting physical and emotional benefits in so many ways. Until you have begun guitar lessons you do not know what it is like to engage with a musical instrument, learning how to interact with the guitar to make music.

The most common questions people ask before they learn how to play the guitar are usually, "How difficult is it to learn to play the guitar?" and "How long will it take before I start sounding like a guitar player?" To take the first question first, it is a little difficult right at the beginning when you have your guitar and some sheet music or guitar tab, and in that first moment as you begin, you realize how much you do not know. But from there it gets easier. You practice for half an hour or an hour a day, you get some callouses on your left hand fingertips and you get to enjoy the routine of learning easy guitar chords. Every day you practice you make some progress.

As for how long it takes before you start making music on the guitar, it varies, but probably around three months. If you practice regularly you can go from a guitar no-nothing to someone who can play a song all the way through, in time, without stopping three months from now. If you do not try, the three months still goes past but you still cannot play the guitar.

What do you learn in the first three months of learning how to play the guitar? Making music means learning guitar chords and learning how to read musical notes in the form of tab or sheet music. You will probably learn to play an acoustic guitar with nylon strings to start off, to give your fingers a chance to toughen up and to learn to play without the sound of an electric guitar covering up your mistakes.

A good thing about the acoustic guitar is quietness. When you first learn to play the guitar you do not need to upset friends and family as you begin your guitar practice. With an acoustic guitar you can also take it with you to practice in a quiet place or when you get a break from your work or studies.

A final point I should touch on is whether you should learn to read music. There is so much guitar tab on the internet these days anyone who wants to learn how to play the guitar should be able to get along quite well without sheet music. It would be hard to find a guitar course that relied on sheet music. If you feel some enthusiasm for learning music theory, you will probably get great benefits from taking the slightly longer road to learning guitar, but if it all seems like too much trouble, you can learn guitar without it.

The next step for you now is to find some easy guitar songs and some advice on how to hold the guitar beginning to learn how to play.
