

Drifter - Combining Style, Function, and Comfort

The Drifter clothing company began in 2002 with the aim of becoming a simple clothing manufacturer that would focus on functionality, style, and comfort. Starting with the simple T-shirt, they break it down and begin to put the pieces back together to create a new product that is reflective of their own brand of creativity and artistry.

First, there is the men's FW 08 clothing line. This line of clothing is smaller than the others and only features 8 designs to choose from at the moment. Altogether there is the Scribe, Chief, Siren, Glory, DOA, and Seer designs. Scribe and Chief are long sleeved shirts that feature the double layered look which appears as if a short sleeved shirt is being worn over a long sleeved shirt. It's a popular style among the youth age group. Each features the signature Drifter image and is made from 100 percent cotton. Glory is a steel grey short sleeved shirt with an image that represents the ongoing power struggle in Columbia.

Drifter's Men's SS 08 line of clothing features their popular Godspeed design which comes in both short sleeve and long sleeve. The shirts come in black and white and display their iconic eagle image. Also available is the grey Deta design, a simple V-neck T-shirt which is made from 100 percent cotton. The Trent design is a long sleeve button up collar shirt with a front pocket. Bully is a simple white T-shirt that comes in white only and is 100 percent cotton with a unique Drifter style image. It is a classic design, updated with Drifter's own unique style and image. Other available designs include Venom, Slip, Based, Riders, the limited edition Badge of Honor, and the Brigadier hoodie.

Finally, the women's SS 08 line of clothing includes a diverse line of tops. Besides the long sleeve Godspeed shirt, there's the Tropics which features a grey, sleeveless peasant top design. Psyche comes in a special coral color and features a wide neck with a drawstring. There are also the Pebbles and Unwritten designs which are more of a standard T-shirt design. Pebbles is white with a light blue, feminine design, and Unwritten is blue with a small flower image. There are many other designs to choose from such as Hey, Input, Striking, Tulips, Dawn Trailing, and Space Suit.

Because the standard T-shirt is a simple design that is cherished and worn by most of the world, Drifter has decided to make this the archetype by which they base each new design. With constantly changing male and female clothing lines available, there will certainly be a Drifter T-shirt that will accentuate your personality and look great on you as well.
