

## Generating Money From Google AdSense

In recent months, MySpace has generated a huge amount of publicity. This social networking site has become so popular that it is reputed to be the most visited English-speaking language website in the world.

While most people use MySpace to connect with friends and loved ones, there is hidden opportunity for smart Internet marketers.

For instance, they know that MySpace contains a virtual goldmine of people who have an interest in a wide variety of products and services. It is just a matter of knowing what to sell them and how to get them to your online website.

So if you are interested in squeezing profit from the 112 million MySpace users, all you need to do is set up simple website. But you might be wondering what type of business works best with MySpace users.

Well the answer is there are three major businesses that can be effectively marketed to MySpace users:

### Google AdSense

The Google AdSense program is one of the best ways generate a profit from MySpace. Since this program is not well known outside the Internet marketing world, most folks are not aware that it is a type of advertisement.

With Google AdSense, you can generate a profit simply by having people click on an ad. There is nothing to sell or promote, all you have to do is present people with good content and make sure that the AdSense blocks are visible enough to be clicked on.

Because of the wide variety of people on MySpace, there is a huge opportunity for any Google AdSense niche. All you need to do is create content that people want to read, insert your Google AdSense and then direct your targeted friends to this webpage.

Then sit back and watch your earnings accumulate while people click on your ads!

### Affiliate Marketing

Widely considered the best way to earn a living on the Internet, affiliate marketing involves sharing revenue between a business (the affiliate merchant) and an individual affiliate. The affiliate is responsible for driving web traffic to the merchant in exchange for receiving a sizeable commission on any sales that are made.

The principle behind this online business is that the affiliate must target a specific niche, then get people who are interested in that niche to go to the website of the merchant.. The hard part is many affiliates have difficulty locating people who have an interest in a particular niche.

Fortunately MySpace makes it easy to locate people based on their interest in a particular product. All you have to do is create a profile and use the special tools to add friends who have an interest in that niche.

Once you have attracted their attention to your profile, you can use the communication tools on MySpace to present the affiliate product to the user. If they buy from your link, you will get a hefty commission.

### Sell Information Products

Just like affiliate marketing, you can easily use MySpace to find people that will have an interest in your information product. The best part is you do not have to split any of the profits like you would with an affiliate program.

With an information product, you can design an entire profile that pre-sells your offer. So when people arrive at your website, they will be targeted and interested in anything that you are selling. All you have to do is create a convincing presentation and the sale will be yours!

All three of these money making models are being effectively used by niche marketers right now!

So don't sit on the sidelines and watch other people take advantage of this social networking system. Start marketing your business on MySpace

today.
